

**The only tool
you'll need
to adjust our
new rotary nozzles.**

Greater adjustability in the palm of your hand

The highly efficient nozzle you've been waiting for is here! Rain Bird® R-VAN adjustable rotary nozzles let you quickly and easily adjust the stream pattern and distance by hand. No more wasted time looking for a special adjustment tool that is never where it should be.

**Greater adjustability in your hand and greater savings
in your pocket – now that's intelligent.**

**Rain Bird® R-VAN – the world's first
hand-adjustable rotary nozzles.**

Our “tool-less” adjustable rotary nozzles save you time, money and water.

- Adjust pattern and distance with just your hand – **no specialty tool required.**
- List price nearly **18%** less than Hunter® MP Rotator®**.
- **Lower precipitation rate** reduces run-off and the potential for erosion.
- High distribution uniformity, thicker wind-resistant streams and larger water droplets ensure **efficient performance.**
- Reduce zone run times by **35%** – meet tight watering windows.
- **Arc adjusts from 45° to 270°** in one nozzle – fewer models to purchase than MP Rotator®.

Costs less. Does more.

Developed for contractors, by contractors.

We designed the R-VAN based on countless hours of working hand-in-hand with irrigation professionals from across the globe. This breakthrough product line delivers everything you asked for in an adjustable rotary nozzle, all from the brand you already trust. Even better, it costs nearly 18% less than the Hunter® MP Rotator®**.

Rain Bird® R-VAN
List Price **\$8.25**

Hunter® MP Rotator®
List Price **\$10.00**

What contractors are saying about R-VAN!

“I really like the tool-less adjustment feature. Other similar rotary nozzles require a tool to make adjustments, and with the R-VAN, it’s not needed. I don’t need to go all the way back to the truck to get that special tool.”

William Bennett
Florida Commercial Care, Tampa, FL

“Convenience is a big thing with the R-VAN. I don’t have to choose 10 different nozzles to cover an area. You just have to buy one type, put it in and adjust it, and you’re done.”

Ray Cinqmars
ELS Maintenance Inc., Phoenix, AZ

“After installing them and seeing how the R-VANs work, we’re definitely going to put the MP rotators away and start getting R-VANs.”

Rob Turley
Custom Turf, Pittsburgh, PA

Efficient performance.

Water lands where it should.

R-VAN’s thicker wind-resistant streams produce larger water droplets that ensure efficient performance, even in the most adverse conditions.

Rain Bird® R-VAN

Hunter® MP Rotator®

35% less watering run time

Meet tight watering windows.

No more wondering how you are going to fit 36 hours of run time in a 24-hour watering window. R-VAN’s optimum precipitation rate of 0.6 in/hr strikes the perfect balance between rates of application and infiltration. Compared to Hunter® MP Rotator®, Rain Bird R-VAN requires 35% less watering run time**.

*Comparison based on 2012 U.S. list price of \$10.00 for Hunter® MP Rotator® MP2000 and \$8.25 for Rain Bird® R-VAN1318 effective 09/01/2012.

**Based on a plant material water requirement of 0.8 in/week, and a square spacing precipitation rate of 0.39 in/hr for Hunter® MP Rotator® MP2000 and 0.61 in/hr for Rain Bird R-VAN1318.
